

THE SEVEN RAYS and YOUR PERSONAL RAY MAKE UP

Are you someone who always wants to know why? Why is it so easy to connect with this person but not that person? Why when I met you did I feel an instant familiarity? Why when I met that person did it seem as though we'd always known each other? Why is it so hard to understand her when she speaks? Why am I the way I am? Why did I choose this profession really? Why does this kind of music move me?

We may well all be connected at the level of Soul, but even our Souls express different qualities of energy!

All energy has qualities. They aren't good or bad. They are expressed at a higher or lower vibration that's all. Very few people understand much about this because it hasn't been "available" for humanity till recently.

A Treatise of the 7 Rays of Energy is a series of books called The Ageless Wisdom which were "given" telepathically to AAB (Alice A Bailey) in the middle of the last century by a Tibetan Lama called Djwahl Khul. He may or may not have been in a body at the time of delivery. She actually refused him three times before finally agreeing to transcribe his words. Humanity was thought to be ready for this information by the year 2000. DK (Djwahl Khul) is still helping the education of humanity from the Inner Planes, being one of the post-graduate human beings.

This information is the underlying foundation of psychology and astrology. If I have piqued your curiosity then this Introductory but immensely useful and empowering class may be for you. See reverse for FALL dates.
