

The School of Integrated Consciousness presents

Esoteric Healing Course 3: The Head Centers

January 8-9 & 22-23, 2022

EH3 offers a unique perspective on the three energy centers of the head: the Ajna, Alta, and Crown.

These centers create a focal point that ultimately serves as a gateway to our most expansive self.

This course explores the physiology of the brain and the role this architecture plays in our psychological and spiritual development. We build upon EH1 and EH2, creating a comprehensive look at the whole chakra system from head to toe.

In addition to a review of the five energy centers along the spine, we will cover:

- the role of the head centers in our personal & spiritual evolution
- energy healing protocols for the Ajna, Alta, and Crown Centers
- an exploration of the devic lifestream
- the function of the major "minor centers" and their healing triangles
- the sutratma and our primary etheric threads
- an esoteric perspective on birth, death, and cycles of life
- an introduction to the nervous system
- the 7 Rays: an introduction to qualified energy streams
- supporting prana in our energy body & a complete EH prana support protocol
- meditation practices for the head centers

Esoteric Healing Course 3 is an immersive course presented via SIC's online learning platform, with live classes on Zoom. It also includes home study guides and assignments, video support material, a downloadable meditation program, and an extensive course manual with 80+ energy healing protocols for the entire subtle system. We oversee in-class practice sessions and support you in developing an energy healing skill set that emphasizes ethics, responsibility, and integrity.

This certificate course is co-taught by Martha Henry-MacDonald & Steve Kramer.

It is recognized by the International Network for Energy Healing and the National Association of Esoteric Healing.
